Of course, anybody who has the attitude of these gold standarders will discount the professed old soldiers borne by them. The subscribers for the gold standard are always so kindly disposed to old soldiers. When the boys were enduring untold hardships during death daily, the gold standarders were not worrying so much

cent dollars. Any kind of money was good for the soldier. Even the 40 cent dollar that he had to pay the paltry \$18 a month, a private soldier, was good money in the eyes of the men at home scheming to get hold of Sam's bonds with the depression and convert them into bonds that were to be paid in cash.

I never heard of one of these
 feared gold standard advocates
 saying that the old soldiers re-
 ceived the wages due them? Have
 you heard one of them demanding
 60 cents that was not in the
 hands of the old soldiers be paid to
 them? Their silence on this point
 is vociferous. No, indeed, these
 so-called guardians of the agree-
 ments never think about that

was a question. They have a record of the past from their own memories and are looking at the future. While these men are now low so dearly suffering death and disease and unhappiness, the gold gamblers were enjoying about them. No, indeed, the too busy manipulating Uncle Sam so they could hay hoove in on the dollar and receive the reward.

On night of June 26th, 1906, bitten by a very poisonous spider, I used several remedies without relief. I purchased a fifty-cent bottle of Liquid Electricity and after a few applications was greatly relieved. I am confident it was instrumental in saving my life. I cheerfully recommend suffering humanity as a valuable first aid medicine.

It is then that these manipulators begin making the defendants pay. Each receives 40 cents on the dollar for their services. This great love of the soldier is a creature of rethoric. It will be observed that those who are howling so loudly are implied contrast with the defendants are not saying anything and are implied contrast with the soldiers at the front while they are fought at the front while they

kind. That is a phase of the business they always avoid. Veterans of the war for the Unrepealed well acquainted with the affliction displayed by these they have an utter contempt for. The men who remained at home were killed in the honor of the Government and the blood of its best man.

men. As to the pay of skilled men there is no comparison, and I deduced thereof that "it was as good as broke" when I was hired there with the exception of four times as road agent. The broke men got from \$150 to \$200 a month. I said that to United States money, I will see that the pay was 50 per cent better than that on the Louisville Nashville system.

"I worked there four years and supported my family well and his pocket home with me \$2,800 in colored United States money."

Liquid Electrolyte absorbed by my wife suffered for twelve months with sour stomach and indigestion and was unable to eat anything without getting relief. By the use of one bottle of Liquid Electrolyte she was well relieved, but actually cured. I for her sake, for my wife's sake, and for my own sake.

HOBOR ROACH, McHenry, Ill.

I stepped on a rusty nail and ruined my foot, causing me to be unable to walk. I was unable to try everything that is usually tried and getting no relief. I purchased a bottle of Liquid Electrolyte. After using it for a few days, I felt the swelling began to reduce and the pain was relieved.

On night of June 26th, 1904, I was bitten by a very poisonous spider, and using several remedies without success. I then used Liquid Electricity, and after a few applications was greatly relieved. The incident was instrumental in my becoming a devotee of Liquid Electricity, and suffering humanity as a valuable life medicine.

HINDMAN, Ky., Oct. 31.—Mrs. R. R. Richee, daughter of Simon St. Richee, well-known engineer, died in this county recently. A month before she was taken out for dead. After having been dressed and placed in the coffin Dr. T. Walker, the attending physician, saw signs of life and resuscitated her. She was taken up to the hospital bed by friends that she would not have died from the time they had taken her down at first. Her prediction was
